MONTHLY REVIEW

In November, Japan's equity market diverged as the TOPIX rose by 1.40% while the Nikkei 225 fell by 4.12%. Negative effects from a pullback in U.S. tech stocks were felt by AI and semiconductor-related stocks which particularly impacted the Nikkei 225 index. During the month, market sentiment shifted from early support driven by strong domestic earnings to mid-month turbulence caused by a worsening of Japan-China relations, falling hopes for U.S. rate cuts, and foreign investor selling, before stabilising on dovish signals from the Federal Reserve. Prime Minister Takaichi's rollout of major fiscal measures, including a JPY 21 trillion stimulus package, fuelled debate over rising interest rates and contributed to yen volatility. Sector performance was mixed with mining, real estate, construction and electric power performing well, while information & communications, marine transportation, machinery stocks lagged.
